2000 PLUS HD SERIES MULTI-SURFACE

The Multi-Surface Pre-Inked 2000 Plus HD Stamps are created using the latest in light burst stamp technology, and features Ultifast alcohol-based ink that dries on non-porous surfaces. The Multi-Surface Pre-Inked Stamps will stamp a clean impression on glossy paper, photos, fabric, glass, metal and many more surfaces that a regular pre-inked rubber stamp will not.

MYSTAMP pre-inked stamps have a photo flash die plate that will leave an impression that looks like it was printed on the page. The MYSTAMP will last 30,000 impressions before re-inking and is an affordable alternative to the Xstamper.

IMPORTANT! Multi-Surface pre-inked stamps utilize an alcohol based ink providing quicker drying on most surfaces. Unfortunately, some surfaces may have special coatings that slow the drying time and/or affect the print quality. Test a sample piece in an inconspicuous location before stamping the desired area. You should always have the bottom cover in place when not in use! Failure to do so will cause the ink to evaporate quickly. You should also keep the stamp in an upright position. If it becomes necessary to store a stamp for any period of time, add a few drops of ink in each hole prior to storage and a few more once a month to prevent the stamp from drying out completely. The use of an air-tight bag, such as a Ziploc, can help reduce the rate of evaporation.

Due to how easily these stamps can dry out when not properly cared for, we no longer offer our lifetime warranty for them when they dry out.
